## **OFS Requirements**

OFS Basic requires at least .NET Framework 2.0 to be installed before OFS Basic can be properly installed. can download .NET Framework from Microsoft updates or from our website at [http://www.misisv.com/ofs/ofs\\_basic.asp](http://www.misisv.com/ofs/ofs_basic.asp). OFS Basic requires Outlook 2007, OFS is **NOT** compatible with Outlook 2003.

**OFS BASIC REQUIRES  
MICROSOFT .NET FRAMEWORK VERSION 2.0  
CLICK HERE TO DOWNLOAD**

## **Installing OFS Basic**

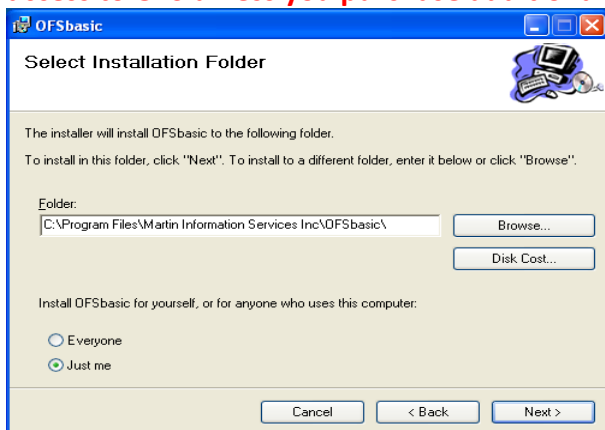

Run the OFSbasic.MSI file and you will be taken to the install wizard. To begin the installation, click "Next".

## **Select an Installation Folder**

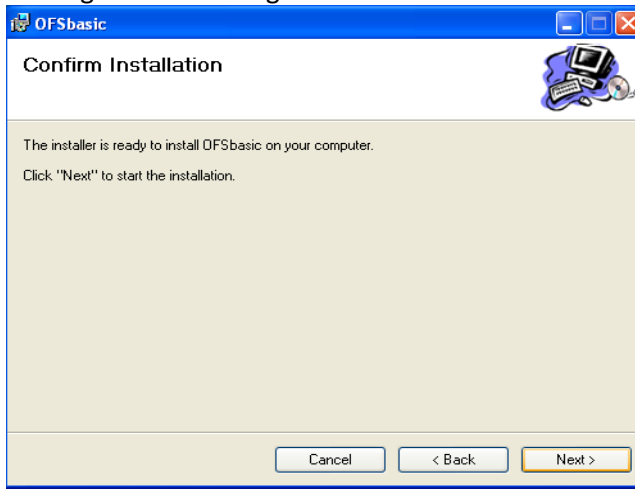

If you do not want to install OFS Basic to the default location, click "Browse" and select where you would like OFS Basic to be installed. Clicking "Disk Cost" will tell you how much available space you have on your disk drive(s) and how much space OFS Basic requires. You can install OFS Basic to any user that uses the computer by selecting "Everyone" or you can install it only to your account by selecting "Just Me".

**\*\*Note\*\* Selecting the "Everyone" option will not grant everyone on that particular PC access to OFS unless you purchase additional licenses.**

## **Confirming the Installation**

Once you have selected where you want to install the program you will be asked to confirm the install, clicking "Next" will begin the install of OFS Basic.

## **Installation Complete**

If there are no conflicts during installation, you will receive an "OFSbasic has been successfully installed" message. Click "Close" to complete the install.
